

General Index to Volume 234

January-December 1986

NB: The Arabic numbers refer to the pages and the Roman numbers I-XII refer to the issues in which the entry will be found.

ARTICLES

Advances in Coal Technology, 34/38 — I
Asfordby new mine, 74/75 — II
Awards for successful students, 27 — I
Blast hole drilling, 17/17 — IV
CEGB and Coal, 45 — I
Chock handling with FSV's, 107 — III
Coal ash utilisation for profit, 120/121 — III
Coal clearance system, 48 — I
Coal monitoring and analysis, 193/198 — V
Computer aided plant management (CPM), 342/4/5/6 — VIII
Computer graphics for public enquiries, 56/62 — II
Computerised methane drainage, 536/40 — XII
Condition monitoring — managing the results, 319/20/22/23/25 — VIII
Control Equipment at Mining, 685, 248/250 — VI
Controlled Material Flow, 458 — X
Decade of Butterwell, 408/10 — IX
Development of longwall conveyors for world markets, 22/25 — I
Development of the armoured flexible conveyor, 16/22 — I
Developments in blasting technology, 468/469/472 — X
Dirt disposal systems, 184/185 — IV
Disposal of Colliery Tailings, 68/71 — II
Drift mine developments, 149/150 — IV
Drilling and cutting systems, 168 — IV
Drilling developments, 161/163 — IV
Environmental Instruments 296-298 — VII
Environment and condition monitoring, 304 — VII
Fire resistant plastics U/G, 512/4/5/6 — XI
Geological aspects of opencast mining, 200/205 — V
Getting supplies to the face, 499/500/1 — XI
Good progress at Asfordby, 274/275 — VI
High Machine Availability on Opencast work, 406 — IX
Improved arch-setting techniques, 154/159 — IV
Improving Maintenance by Routine Condition Monitoring, 382/8/8 — VIII
Induced Bed Caving over Coal Seams, 433/4 — IX
International coal preparation trends, 284/287 — VII
Latest Developments in Roof Supports, 103/107 — III
Longer conveyors, 206/211 — V
Long-term view on coal-to-oil plant, 275 — VI
Maintenance Management, 348/350 — VIII
Maintenance management system, 180 — IV
Maintenance of High Speed Underground Locomotive Transport Systems, 327/28/30 — VIII
Maintenance of Mining Machinery in National Workshops, 361/2/5 — VIII
Maintenance of Surface Mobile Plant, 368/9/370/3 — VIII
Markham Roadway Support at Clipstone Colliery, The, 64/67 — II
Memory-programmable Control Systems Underground, 413/4 — IX
Mine mishaps, 40 — I
Mine roadways deformation, 478/480/482/483 — X
Mine vehicle and material management system, 172/174 — IV
Mining Electrical Developments, 450/452/456 — X
Modern Mine Shaft Design in the UK, 423/4 — IX
Monitoring Equipment, 298-302 — VII
Monitoring of coal quality, 191 — V
Moving experience at Ellington, 450 — X
New Coal Face Technology, 240/243 — VI
New coal-winning techniques, 253/257 — VI
New mines in the Midlands area, 49/50 — I
New Rockbolting System by Boart, 508/11 — XI
New Technology and Maintenance Requirements, 333/34/38/41 — VIII
Oil from coal, 267/271 — VI
Opencast Mining — Planning and Start-up, 93/94 — II
Opencast Site Planning and Authorisation, 401-4 — IX
PCD rotary drilling tools 542-3 — XII
Personal noise exposure, Part 1, 136/140 — III
Personal noise exposure, Part 2, 213/216 — V
Poclain 61 breaks new ground, 205 — V
Poclain 170 in UK, 250 — VI
Progress at Selby, 111/118 — III
Proposed underground gasification, 219 — IV
Radio Systems for Underground Mining, 492/4/6/8 — XI
Reducing wear, 124/128 — III
Reducing wear in the mining industry, 133/134 — III
Review of Selby and North Yorkshire Area, 440/442 — X
Ripping machine developments and subsequent dirt disposal, 551-2 — XII
Roof bolting in friable strata at Rufford Colliery, 305-307 — VII
Seams with 'Spon Con' risk, 418/20 — IX
75 years of safety research, 474/476 — X
Strata Consolidation, 503/6/8 — XI
Structural Maintenance, 374/8/380 — VIII

Surface and Underground Drills, 168/167 — IV
Surface to Face Communication, 426-30 — IX
Surface soluble oil mixing plant, 553-8 — XII
Technical Innovations, 244/247 — VI
The new British Coal, 460/461/462/463/464 — X
The New British Coal, 581/9 — XI
Towards complementary exploration drilling techniques, 544-50 — XII
Training for the 1990s, 261/266 — VI
Tube press for mineral dewatering, 72 — II
Tunnel guidance, 88/90 — II
Tunnelling machines, 91 — II
UK coal managerial supply, 266/228 — V
UK's future coal ventilation requirements, 291-294 — VII
Uncoiler helps update efficiency and production at Oxcoft, 187 — IV
Underground Roadway Development, 77/88 — II
Use of Free Steered Vehicles, The, 6/14 — I
Vertical Bunkers, 444/446 — X
Winder Design Philosophy — its Effect on Maintenance, 352/4/6/7/8 — VIII

**WORLD
 MINING
 CONGRESS**

KRUPINSKI SCHOLARSHIPS

Founded to promote international co-operation in mining science and technology, to support mining training and to commemorate the late Professor Krupinski who was founder and, for many years, Chairman of the World Mining Congress.

To provide brief periods of practical experience and training in other countries, the World Mining Congress has arranged a scholarship programme for young graduates or similarly qualified mining engineers. All expenses will be met during a period of between 6 and 12 weeks by the host country which will provide an opportunity for practical mining experience and a general programme of visits to mines, mining machinery facilities and design/research institutions. Candidates and/or their sponsors will be responsible for the cost of travel to and from the host country. They should be in the age range 25-30 years and have a good knowledge of one of the Congress languages (English, French, Russian, German, Spanish) or the language of one of the host countries.

All enquiries should be made before March 31, 1987 to the Secretary-General in Poland. Application forms will then be sent directly or through the

National Committee where the application is from a candidate in a World Mining Congress member country.

The Scholarships will be available in May-September period of 1988 and will be awarded by the International Organizing Committee of the World Mining Congress. Scholars will be allocated to particular countries reflecting language ability and mining experience.

The countries sponsoring the Krupinski Scholarship programme are: Belgium, Czechoslovakia, Federal Republic of Germany, German Democratic Republic, Great Britain, Hungary, India, Poland, Spain and Sweden.
